complex. But there is nothing complicated about what it is designed to accomplish. This is, simply, the reconstruction of the countries smashed by war, and the revival and ex-

pansion of world trade. Outlining the story in its broadest and simplest terms, the problem begins with the fact that peace finds many nations in a critical financial conditions. Some are bankrupt and others merely hard pressed. 佈利頓森林計劃是複雜的o但是

她們想完成的事業並沒有什麼繁難 之點 o 簡單言之) 其目的在重建為 則爭所毀壞了的國家和復興與擴充 世界貿易O我們要是提綱挈領的以 簡單的名詞來說明這件事體,那就 是說和平以後各國都遭遇到危急的 經濟情勢o有些國家已經破產,有一部是自然問題

些國家是在茍延殘喘。 Those countries which were occupied by the enemy or which became battlefields are affected most badly. They are straitened in terms of money and goods, but, worse still, in their ability to produce the material things people eat, wear, and use - buy, sell, and exchange. Their farms, factories, and cities are damaged or destroyed. Their merchant fleets, i any, are gone, along with their locomotives, farm machinery. freight cars, trucks, automobiles, horses, mules, and carts. Their bridges are down, their roads obliterated. They represent an enormous potential market for machinery, steel, cement, and an infinite variety of tools and materials. Before

700 yards respectively in load at the Taku bar into tugs for the 30-mile journey up the

China's export trade. As it will be linked to North Chias's

extensive hinterland transport system, consisting of a well planned network of railways and an evenly distributed system of rivers, it will prove a convenient and cheap outlet for the products of North China and Manchuria, including coal, salt, iron ore, alum and raw cotton.

新港在經濟上相當有價值對於中國的出口貿易也值與一提》它將來和華北內地交通(包括特密的鐵道網和平均分佈的河流)連結起來時會成爲一個便利的經濟的出產口華北和東北的產物包來煤鹽,鐵,鐵苗,明礬,和棉花等可以由此出口When completed

When completed, it is estimated that the new port will yield a yearly profit of 28,-000,000,000 Chinese dollars (about £2,155,000), in addition to permitting some 400 large vessels a year to enjoy harbon facilities, instead of having to anchor at sea at present.

新港完成後,預計每年可得統利 一百八十億元(合英磅約一百一十 五萬)並且使每年有四百隻虧享受 倦口的便利免得像現在似的要在海

Owing to the tremendous quantities of silt carried down by the Hai river to the estuary at Tangku, a coastal vessel of 3,000 tons can at present enter port even at high tide, while ships of deeper draught have to ancher at least a dozen miles from shore.

因為豫河流到塘沽海口狹帶着多量的淤泥)所以三千噸的海航現在 受不能進到港內甚至於在湖水高的 時候也不可能吃水架的輪船至少也 得在海岸外十二公里的地方下錯。
